

FCC Commissioners
The Federal Communications Commission RE: Docket 04-435
445 12th Street, SW
Washington, DC 20554

Dear FCC Commissioners ,

I am writing to voice my concerns about the FCC's proposal to relax the restrictions on the use of cell phones on airplanes in flight.

There is no hard evidence that cell phone use doesn't interfere with navigational instruments. The introduction of cell phone use in the cabin will not only increase tension among passengers, it will compromise flight attendants' ability to maintain order in an emergency. Cell phone use could also enable terrorists to coordinate a plan of action more effectively.

Please leave the current rules in effect.

Cellphones have interfered with the remote keys to my car and when asked my car dealer has even said that they can. I will not be flying until it is PROVEN beyond doubt that they will not affect planes in flight and I will suggest this to all of my family at reunions and everyone that I see at my class reunions as well.

Sincerely,

David Guidry
